

## Welcome to IT Call

Experts In Computer Repair Whatever your IT requirements IT Call is here to help. Whether it is a simple software update or a complete network installation IT Call caters for it all. With a strong commitment to quality and reliability IT Call prides itself on providing business and individuals with a honest, reliable and convenient service from it base in Manchester. Experienced & Qualified Engineers

The collective IT experience of the business founders amounts to over 20 years on the IT industry. Keeping up with fast moving technology has become a major part of IT Call's activities. Knowing how to install and configure the latest hardware and software is not enough if you are not able to support existing client systems. That is why as well as keeping up to date the Engineers at IT Call always maintain a strong knowledge of legacy systems.

### Greater Manchester Computer Repair

Being based in Manchester on the thriving A6 (Stockport Road) makes us within easy reach of the city centre. Businesses around the Manchester area recognise the value of having someone within easy reach to fix their computer related problems.

Businesses and individuals have now become dependant on IT in their day to day life. To ensure that there is no or minimal disruption to a running business IT Call recommend taking out a maintenance contract. This would be more economical than calling out an engineer everytime there is a computer problem.

Most of the laptops, desktop computers and PDAs are repaired at our Manchester workshop, but we have links with major third part repair centres to cover for overflow during busy periods. Most server and networking support work is carried out at the client's site.

Computer Call out service We currently cover the Greater Manchester area for call outs and are looking to expend further in the North West and beyond. If you live outside the Manchester area please call us to check if we can send an engineer out to fix your computer problem. With very reasonable call out charges and attractive maintenance packages clients of IT Call are never left out in the cold. Sign up to a maintenance plan today to ensure that you are never in a position where you miss great opportunities because of a simple failure of your IT systems.

Apart from fixing hardware such as desktop computers, laptops and servers IT Call can provide other services such as fixing software problems, ADSL broadband, VOIP, Website hosting and design. Contact our sales team to find out more. Call us now on 0845 680 1238 or email us on [info@itcall.com](mailto:info@itcall.com)
